Introduction

I have developed a product-oriented mindset in my journey with Computer Science. Working experience on different aspects and lifecycle of software development process improved my agility and adaptability.

Education:

- **BSc:** City University   **CSE**   2016 – present   **CGPA_3.17(10th semester)**
- **HSC:** Govt. Safar Ali College   **Science**   2012-2014   **GPA_4.5**
- **SSC:** Sultanshadi High School   **Science**   2006-2014   **GPA_4.75**

Skills:

- **Programming Language:** JavaScript, PHP, Java, C

- **Front End:** HTML, CSS, XAML

- **Database:** MSSQL server, MySQL

- **Front End Framework:** VueJs, jQuery, Bootstrap

- **Back End Framework:** Entity Framework, laravel

- **Version Control:** Git

- **Other:** Good understand in OOP concept.

Extra Course:

- Java swing and making some project (Student Management Application, Vowel Counter).

Personal Projects:

- **Online E_Agriculture:** The main features of the information system, Farmers are Import product for bidding crops and give the minimum prize with all details. Customer Can buy Crops with bidding. Technologies used HTML and CSS (front-end of web app version), laravel as back-end. It's under still underdevelopment.

- **Ecommerce:** Our System is an e-commerce website from where people can buy products online. Admin monitors the activity of the users and checks the transactions.

Related Course Works:

Completed classes on these computer programming-related topics in those passed semesters:

Structured Programming   Object Oriented Programming   Data Structure   Algorithms

Database Management System   Artificial Intelligence   Web and Database Programming
